

STANDARD OPERATING PROCEDURE: DATA BACKUP AND RECOVERY

SOP-IT-BKP-007 | Version 2.0 | Owner: Infrastructure Team

1. BACKUP SCHEDULE

Production databases: full backup daily at 02:00 UTC, incremental every 6 hours.

File servers: nightly snapshot with 30-day retention.

Critical application configs: version-controlled in Git with hourly sync.

2. RECOVERY TIME OBJECTIVES

Tier-1 systems (payment, auth): RTO 1 hour, RPO 15 minutes.

Tier-2 systems (internal tools): RTO 4 hours, RPO 1 hour.

Tier-3 systems (analytics): RTO 24 hours, RPO 24 hours.

3. RESTORE PROCEDURE

Step 1: Declare incident and assign recovery lead.

Step 2: Identify last clean backup from backup catalog.

Step 3: Restore to isolated staging environment and validate integrity.

Step 4: Failover production traffic after sign-off from system owner.

4. TESTING

Quarterly restore drills are mandatory for all Tier-1 and Tier-2 systems.

Results must be documented in the compliance audit log within 5 business days.
